NATIVE HABITAT DEVELOPMENT FOR POLLINATORS

The Native Habitat Development for Pollinators program was created to restore and conserve native plant communities that benefit pollinators and associated wildlife species. Pollinators, including bees, butterflies, moths, wasps, flies, beetles, ants, bats, and hummingbirds, are attracted to areas that have adequate sources of food, shelter, water, and nesting sites. They are an integral part of the environment and our agricultural systems.

Seed consultants are available to custom design a seed mix to fit your budget

Please call Monday-Friday 8am-5pm

GLACIAL HABITAT RESTORATION AREA

The Glacial Habitat Restoration Area is a SAFE project sponsored by the DNR. This project includes land in parts of Winnebago, Fond du Lac, Dodge, and Columbia counties. The project seeks to restore habitat for important grassland birds such as bobolinks, eastern meadowlarks, grasshopper sparrows, Henslow's sparrows, and ring necked pheasants. The practices being offered include wetland restorations, shallow water areas for wildlife, cool season grasses, warm season grasses, tall grass prairies, and oak savanna. Some existing hay land may also be eligible.

SOUTHWEST WISCONSIN GRASSLAND CONSERVATION AREA

The Southwest Wisconsin Grassland Area SAFE project is sponsored by the DNR. This project includes land in parts of Dane, Green, Iowa, and Lafayette counties. The project seeks to restore habitat for important grassland birds such as bobolinks, eastern meadowlarks, grasshopper sparrows, Henslow's sparrows, and ring necked pheasants. The practices being offered include cool season grasses, warm season grasses, and prairie restorations. Some existing hay land may also be eligible.

CENTRAL WISCONSIN GRASSLAND CONSERVATION AREA

The Central Wisconsin Grassland Area SAFE project is sponsored by the DNR. This project includes land in parts of Adams, Clark, Marathon, Portage, and Wood counties. The project seeks to restore habitat for the important grassland birds such as Henslow's sparrows, grasshopper sparrows, upland sandpipers, eastern meadowlarks, and bobolinks. The practices being offered include cool season and warm season grasses. Some existing hay land may also be eligible.

WESTERN PRAIRIE HABITAT RESTORATION AREA

The Western Prairie Habitat Restoration Area SAFE project is sponsored by the DNR. This project includes land in parts of Polk and St.Croix counties. The project seeks to restore specific habitat for bobolinks, grasshopper sparrows, Henslow's sparrows, and sedge wrens. Limited practices are being offered which include some specific wetland restoration and diverse prairie restoration.

KARNER BLUE BUTTERFLY AREA

The Karner Blue Butterfly Area SAFE project is also sponsored by the West Wisconsin Land Trust. The project includes land in parts of Eau Claire and Jackson Counties. This project seeks to restore very specific habitat for the threatened and endangered Karner blue butterfly. The butterfly requires the lupine plant to be present as it plays a key role in the butterfly life cycle. The only practice being offered in this project area is a very diverse prairie seed mix which must include lupine.
